When asked about issue of Common Core in Catholic Schools, I have to ask, which issue?

- The fact that Common Core was written by trade organizations and not educators?
- The fact that Catholic Schools are NOT obligated to accept CC, but Dio. Ed. officials did it anyway?
- The fact that most Bishops, Pastors, and Parents do not know about Common Core?
- The fact that Catholic Diocese Ed. officials have not been watchdogs of authors of sex-explicit material?
- The fact that CC material sexualizes our children in a slow, aggressive, methodical way?
- The fact that Govt. CC sees children as capital rather than souls created in the image & likeness of God?
- The fact that Common Core was implemented without parents' knowledge?
- The fact that Common Core undermines parental authority?
- The fact that Catholic parents are not getting answers to their concerns?
- The fact that Common Core was adopted by states without any legislative approval?
- The fact that Common Core has not been tested?
- The fact that CC is lower than many standards that were already in place?
- The fact that CC collects data on our children and family without permission?
- The fact that personal information is being sold to testing companies for profit?
- The fact that local school boards have lost all control over their schools?
- The fact that Govt. changed laws to release personal data to virtually anyone?
- The fact that students are struggling with questionable math problems?

**The fact that you have no idea about this?
Now which issue would you like to discuss?
Now that is Common Core!**

CATHOLIC SCHOOLS NO MORE WITH COMMON CORE
